

PRODUCT INFORMATION AddPlus-Funk_TY_US - 05.01.2021 - www.vsamerica.com

AddPlus Functional rail.

Construction comprises an aluminium profile section with integrated function groove for accommodating organisation aids on the user side or screens on the reverse side. The function rail is secured to tabletops made of chipboard, HPL, CPL or MDF in the metal cable outlets on the left and right sides.

Range of application. AddPlus can be used on Serie 901, Serie 910, Pareto and NetWork. The tables must however have a straight longitudinal edge (e.g. rectangular, wedge-shaped and sinusoidal tables).

Note. The filled cable outlet can still be used for cabling.
